Women's Leatherette Trench Coats

A Protection Against Wind and Rain \$6.75

A coat of real, everyday service. They are made of a Superior quality leatherette and fully lined. Colors: black, navy and green.

Teamwork

The one word or term embodying this thing most needed now and most likely to be needed in an increasing way for the long pull back to more satisfactory economic and business conditions is, in our opinion, "Teamwork." If there ever was a time called for "the long pull and the strong pull altogether," that time is now.

A farmer following his horses as he guides a plough along the furrows knows what teamwork on the part of the horses means; also teamwork between the horses and the ploughman. Even he realizes the full value and necessity of such teamwork in an even more striking manner when it is lacking, and, as the outcome, proper results are not being achieved.

Men participating in the many fields of sport have a full appreciation of the value of teamwork. Every successful captain of a team drills it into his men. But how frequently one reads that such-and-such a team, while composed of brilliant and superior individual players, lost out to an individually inferior team because of a lack of co-ordinated effort.—in a word, teamwork. And this lack of teamwork all too frequently results in defeat, one or more of these individually brilliant players desire to keep themselves in the "spotlight," play to the gallery, and win plaudits for themselves rather than for the team as a whole.

Success in military exploits depends to a very large extent upon teamwork, the co-ordination of every arm of the service to the achievement of one common object, the co-operation of each unit with every other unit, both in preparation and final action, to the end that victory be won. Without this "union in service" the bravest men in the world are likely to suffer defeat at the hands of an inferior but more unified force. Victory does not always rest with the big battalions, but with the compact body which moves and acts with precision as one man.

The same principle applies with equal truth and power in the realm of national, political, and community life. If in an army the artillery consisted of isolated units, and it alone was the effective instrument in winning battles, and instead of co-operating with the infantry, tanks, machine-guns, and aircraft, actually ignored and even strove against them, the enemy would win. Yet, how often groups of people having a common object in community effort or in the political arena instead of working together to achieve that object, actually oppose each other solely because they do not agree upon every detail of their programme, nor see eye to eye as to the methods by and through which the reforms desired by all are to be brought about. And the result, of course, is victory for the other group or policy to which they are all opposed.

There are many time-honored maxims which point the truth that teamwork is essential to success. "In union there is strength," "United we stand, divided we fall"; while for the enemy forces there is always the further maxim: "Divide and rule."

Teamwork can only be brought about by a willingness to compromise. Some good people regard the word "compromise" as something essentially wrong, as a great evil. True, right cannot compromise with wrong, nor honesty with dishonesty, but where two are striving for what both believe to be right, and in opposition to what they are agreed is untrue or wrong, it is the height of folly to divide into separate and opposing camps, weakening each other and the cause they both desire to advance, simply because of minor differences of opinion as to exact objective to be achieved or the methods by which it shall be achieved. Unless there is compromise, rather than each one insisting upon acceptance of their views to the exclusion of others, failure for both must inevitably follow and victory be recorded for the common enemy.

The experiences through which the world is passing have impressed a majority of people with the need for more or less radical changes in our economic and social structure. That change is necessary is fairly well recognized, but some desire to move much more rapidly and drastically than others; some believe the remedy for our ills is to be found in another policy; others, again, advocate something else. All want improvement, reform. But through divided councils, lack of co-operation, a want of an absence of minor differences of opinion as to exact objective to be achieved or the methods by which it shall be achieved. Unless there is compromise, rather than each one insisting upon acceptance of their views to the exclusion of others, failure for both must inevitably follow and victory be recorded for the common enemy.

This condition prevails in society, business, community effort, in municipal, provincial, and international politics. It is even found in family life. It is fatal to progress, a continually delaying factor in the onward march of reform.

What the world needs today is not antagonism, but mutual sympathy; not competition, but co-operation; not isolated effort, but co-ordination of effort; not single-handed play, but teamwork. And these things can only be brought about by compromise. So, let's compromise and develop mutual strength through teamwork. Let's all will then begin to get somewhere, and out of the slough of depression in which it continues to founder.

Trans-Canada Highway Estimates Announced

Federal Government Contributing Fifty Per Cent. of Cost

The total estimated cost of work to be carried out on the Trans-Canada Highway under the Unemployment Insurance Relief Act, 1931, approved May 2, amounts to \$9,996,972, of which the Dominion government has agreed to contribute 50 per cent. or \$4,998,486.

This information was laid on the table of the House of Commons by the government in answer to a question of Sir Eugene Flies (Lib., Rimouski). The federal government has paid to date to each province the following amounts: New Brunswick, \$60,376; Ontario, \$1,575,000; Manitoba, \$251,934; Alberta, \$102,429; and British Columbia, \$237,427. These grants, made in connection with the highway, total \$2,547,169.

Barrie Advanced His Birthday Celebration

Noted Author Wanted Ramsay MacDonald As One Of Guests

Sir James M. Barrie, noted author, advanced his birthday celebration five days ago. Ramsay MacDonald, Prime Minister, could attend the party before undergoing the second operation on his eyes.

The 72nd birthday of the creator of "Peter Pan" fell on May 9. But he celebrated it May 4, with a luncheon at his London home, overlooking the Thames.

Besides the Prime Minister, other guests at the birthday party were Stanley Baldwin, Conservative leader; Sir Herbert Samuel, leader of the Liberals; Sir Austen and Neville Chamberlain, Viscount Snowden of Inchmaw, Winston Churchill, G. K. Chesterton and the French Ambassador, A. De Fleurbaey.

More Testing Advocated

Importance Of Keeping Record Is Recognized By Dairymen

A statement just issued by the Dominion live stock branch with respect to testing and production of dairy cows is of special interest at this time. It shows that there is in the whole of Canada a total of 3,833 cows out of an aggregate of 63,336, or only 1.72 per cent. now under official test.

Cow testing in Ontario, Saskatchewan and British Columbia, is now carried out under the supervision of the provincial department of agriculture, while in the other six provinces the federal government is carrying out the work. There are at the present time a total of 447 associations in the several provinces engaged in carrying out this form of activity.

A new highway machine invented by an Iowa, digs up the surfaces of old gravel roads, mixes the material discovered underneath with gravel, and the mixture back on the road again.

Palpitation of the Heart Could Hardly Get Around

Mrs. Charles Storms, R.R. 5, Pictou, Ont., writes: "I was troubled with palpitation of the heart; couldn't sleep, day or night, and was so weak I could hardly get around."

After taking Milburn's Heart and Nerve Pills I was greatly relieved of these attacks. My mother also has great faith in them and finds no other medicine can help her so much for heart trouble.

I can assure you that Milburn's Heart and Nerve Pills are a wonderful bulwark."

Canada Produces a New Metal

Rare Metal Known As Selenium Has Many Uses

A new metal known as selenium is the latest addition to the several refined metals now produced in Canada, according to a statement issued by the Canadian Government Department of Mines. Selenium, says the statement, is a valuable and useful metal in the glass industry where it is used as a colorizer and for neutralizing other colors; it is also used in the pottery industry for the same purpose. In the manufacture of rubber products, the new metal serves as a vulcanizing and accelerating agent and because of reputed properties of increasing resistance to abrasion of rubber up to as much as 80 per cent., it may have a large potential market in the rubber industry. One of the most important potential uses is in the production of selenium cells for television transmission and reception.

This metal, now included in Canadian mineral products, is not very abundant in nature though fairly widely distributed. It is found associated with sulphur compounds and often accompanies sulphides of heavy metals in the form of selenides. In the electrolytic refinery of copper, the selenium remains in the slime or residue, from which it is extracted. The current price of selenium during 1931 was \$1.80 to \$2 a pound and the marketable forms are amorphous powder and small rods and buttons. It is expected that research will develop new uses for selenium and broaden the market for this relatively new commercial product.

Artists Must Live

New York Exhibitors Barter Pictures For Rent and Food

Members of the Society of Independent Artists exhibiting at Grand Central Palace are marking the rent "paid" in exchange for pictures. A Madison Avenue modeler has a picture of Taos Canyon well enough to design a gown for the artist.

One young lady wants to exchange her saddle horse, which eats, for a picture of a horse, which doesn't eat. One dentist will hang twenty new paintings in his office and gaze upon them as he dispenses service to twenty new artist-patients.

A cubistic painting of George Washington brought two cases of sardines from a wholesale house, which decided later that it didn't care for the picture.

Customers Were Attracted

Unusual Advertising Of New York Merchant Brought Results

An enterprising advertising manager of a New York department store decided to "tell the truth" in his public notices to prospective customers. "These gowns are not serviceable," a tag placed prominently on certain transparent velvet gowns proclaimed. "They won't wear, and you should buy them only if you have a large wardrobe."

And the women gathered around the gowns excitedly, almost frantically, clearing out the entire stock in a single morning.

The next day he advertised "shocking stockings," and his success was repeated. Now he's trying to find out whether it was because his advertising was frank or simply because, as he suspects, women are strange creatures.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mott's Worms' Worm Extirminator.

The First Bicycle

A Frenchman, M. de Sivrac, is said to have originated the idea for a bicycle. His first machine appeared in Paris during 1680. It consisted of a wooden frame and two wheels. Locomotion was achieved by pushing on the ground with the feet.

Architectural glass with the strength of light building material has been developed at a New York glass works.

Suffering in silence is more fun if you explain what you're doing so nobody will miss it.

Plane Surprises Natives

Dayaks Of Borneo Wanted To Know If Flying Machine Laid Eggs

The head-hunting Dayaks of Borneo were so intrigued at the sight of their first aeroplane that they wanted to know whether it laid eggs.

Richard Halliburton, of Memphis, who is on a leisurely flight around the world, told the story to associates in New York in a cable from Manila.

The Tennessee-flyer's message said he had arrived at Manila at the end of a 40,000-mile flight and had spent three weeks in Borneo with his plane, the "Flying Carpet," visiting the head hunting Dayaks, who never had seen an aeroplane.

"Took the chief flying in native undress, except for goggles," the cablegram said. "Apparently big event in Dayak's history. War boats were filled with warriors who came 100 miles to see the chief fly. Dayaks asked if aeroplane laid eggs."

Used Ancient Seed

Green Peas From King Tut's Tomb Cultivated Near Port Arthur

Green peas, King Tutankhamen's own favorite brand, are growing today in Pass Lake 25 miles north of Port Arthur. M. Pejstrup is the possessor of more than two hundred of them grown on one stalk.

A year ago Mr. Pejstrup visited his home in Denmark and while there purchased a solitary pea for \$25. He tells that six peas were brought from the tomb of King Tut in Egypt by a Danish missionary and sold for mounts varying from \$25 to \$50, and the one purchased by Mr. Pejstrup was planted here in the Danish settlement last summer.

The stalk of the pea was about five feet tall topped with a cluster of multi-colored flowers. The stem being about half an inch in diameter. From the solitary pea planted a yield of over 200 was obtained.

What the automobile has taught women about household lubrication

Experience with motor cars has taught women that moving parts must be protected against wear by a film of oil. Many of them haven't learned, however, that moving parts in lawnmowers, washers, and other mechanical devices must also be protected against dirt and rust.

3-in-One Oil not only lubricates; it also cleans and protects. It is different from all others, because it is a scientific blend of three high grade oils—animal, mineral and vegetable. It is the oil you should use on mechanical equipment if you want best results.

Don't risk your expensive household devices by using oil that does only half the job. Insist on the good 3-in-One. It costs little more to buy and much less to use. At old stores everywhere. For your protection, look for the trade mark "3-in-One" printed in Red on every package.

New Weapon For Surgery

Operation To Remove Cancerous Lung Was Successfully Performed

For the first time in the history of surgery and the treatment of cancer, an entire lung, with a cancer in it, has been removed by the use of the knife, and the patient cured.

This was made known in an interview with Dr. A. L. Lockwood of the Lockwood Clinic, who has returned to Toronto from the annual meeting in Ann Arbor, Mich., of the American Society of Thoracic Surgeons, where the disclosure was made.

During the society's three-day meeting, details of this extraordinary operation were revealed in detail by Dr. Edward D. Churchill, of Boston, Mass., who performed this feat of surgery. The patient's chest was lifted, and all three lobes of the right lung, the entire lobe containing the cancer, were cut entirely away.

Dr. Churchill's case, it was demonstrated, had made it clear that there was one further site of cancer which could be dealt with surgically, which in the past could not be so dealt with at all.

Like a Grip At The Throat. For a disease that is not classed as fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in increasing dread of its return. Dr. J. D. Kellogg's Asthma Remedy is a wonderful remedial agent. It immediately relieves the restricted air passage as thousands can testify. It is sold by dealers everywhere.

Called His Bluff

The time had come to dish up the ration, and in an Irish regiment the quartermaster and his assistant had been portioning them out in preparation for distribution.

The quartermaster turned to the quartermaster and, with a twinkle in his eye, said: "Av ye place, sorr, there's a loaf short. Who'll I give it to?" "Keep it yourself," Mike replied the quartermaster.

George Higbie, 84, of Rothesay, claims to be the oldest working compositor in Scotland.

Large shipments of construction materials continue to arrive in Manchuria.

Of the 92 chemical elements, 47 of them are found in the sea.

Advances New Theory

Famous Cleveland Surgeon Believes Man Has Two Brains

Belief that man has two brains, a highly developed one in his skull and a second one in the adrenal glands near the kidneys, is held by Dr. George W. Crile, famous Cleveland surgeon.

Dr. Crile expressed his opinion in a lecture to army officers here. It is disclosed. He was discussing the effects of shocks of various sorts on soldiers.

Experiments, Dr. Crile said, had led him to believe that some forms of shell shock and other nervous disorders were linked up with man's possible possession of the two-part brain. The original brain, before man was even a vertebrate, in the Crile theory, would be the adrenal one, an emotion brain, that responded to impulses of fear, etc. The new brain, the one in the head, is the thinking one, capable of reason.

The brains are connected, Dr. Crile explained, by the spinal cord.

The importance of the theory, Dr. Crile felt, was that it seemed to permit successful treatment of nervous disorders, in some instances by anaesthesia, which temporarily suppresses the adrenal one, and in others by the removal of the adrenal one and made operative treatment possible.

Operatic Economy

Suggestions Which Might Help To Cut Down Overhead

Just now the sponsors of the Metropolitan Opera in New York are seeking means to cut down the overhead. And that might be so difficult as it seems. The leading tenor for instance could endorse larynx-soothing cigarettes between acts.

The sextet in Lucia di Lammermoor could, for a season or so, be reduced to a quartet. A safety razor would solve the problem of "The Barber of Seville." Why shouldn't the tenor in "Carmen" make his entrance on roller skates? And after all, why to the expense of hiring a firing squad at Tosca, when one gent, armed with a sub-machine gun, could do the dirty work as efficiently, and much more cheaply?—Border Cities Star.

China Leading Customer

China is the leading customer for complete aircraft made in the United States. In both 1930 and 1931 China held the lead over all other countries. The Chinese like American machines because their territory bears a remarkable similarity in flying conditions to those in the United States.

Arsenic can be used advantageously in wood preservation processes.

Cried at Night

"Night after night, as soon as we would get settled in bed, baby would start crying. . . BABY'S OWN TABLETS changed all this. What a blessed relief," writes Mrs. Arthur Baker, Jr., Winona, Ont.

Baby's Own Tablets for teething troubles, colds, croup, whooping cough, colic, indigestion, and all baby troubles. 25c package.

Dr. Williams' BABY'S OWN TABLETS

Of the 92 chemical elements, 47 of them are found in the sea.

Split the Atom

Scientists Pave the Way For Transmuting One Element Into Another

Two British scientists have at last "split the atom," paving the way for transmuting one element into another, the goal of alchemists many centuries ago, and the dream of modern chemists.

Dr. F. D. Cockcroft and Dr. E. T. S. Walton reported the result of experiments in the Cavendish laboratory which culminated in the transmutation of hydrogen atoms into helium atoms, by bombarding them with electric particles.

Dr. Cockcroft said he and his colleagues bombarded hydrogen atoms with a voltage of 120,000 and that under the bombardment the hydrogen atoms began to break up into helium, a still rarer gas. The helium atoms, he said, came out of the bombardment with energies of 100 to 160 times those of the particles fired into them.

Only one particle broke up, however, for every 10,000,000 particles used to bombard it, he said. Optimistic scientists have long hoped to split an atom, some contending that when this feat was accomplished a boundless source of energy would be available. There have been extremists who feared the accomplishment would mean the hurling of the world to destruction.

"It is difficult to say what this discovery may lead," Lord Rutherford said. "Up to the present the experiments have not yielded anything which will be of immediate commercial value."

A Sincere Compliment

New Vicar Was Sized Up As Real Good Sport

The new vicar paid a call on the most wealthy of his parishioners, who was delighted to find that the clergyman was a man of such broadmindedness and with such an interest in sport. After they had discussed the local race and other recent affairs in sport the vicar rose to go. The other, clapping him heartily on the back, said "I think we shall get on very well together, vicar. To tell you the truth I hate those religious parsons."

Persian Balm—the peerless aid to loveliness. Delightfully fragrant. Dainty to use. Leaves no stickiness. A little gentle rubbing and it is swiftly absorbed by the tissues. Tonic in effect. Soothes and dispels roughness and chafing. Keeps skins soft and velvet-textured. Unrivaled for chafe, distinction and refinement. Used by lovely women everywhere to preserve and enhance their natural beauty.

Too Bad For The Wife

A farmer appeared the other day at a theatre that is accepting two dozen eggs as the price of admission. He handed a paper sack to the ticket-taker.

"There's a couple of dozen eggs, mister," he said. "I want to see your show. I'd have brought the missus with me if the hens had shelled out a little better."

Camels in the small province of Cirefalecia, Africa, now number 40,000.

Poison ivy is most virulent at the flowering season.

Danger In Worn Tires

If Used At All Should Be On Rear Wheels

It has been pretty definitely established that the rear right tire is the first to wear out, the rear left next, the front right next, and the front left last of all.

As a result, practice has become almost general to shift the worn-out rear tires to the front wheels with the idea of evening up the wear.

This, however, is dangerous. When a worn tire blows out on a rear wheel while the car is travelling at a high rate of speed, the driver still has enough control to get the front wheels to guide the car safely out of a dangerous skid.

When, however, a front tire lets go, and the car is moving fast, there is almost nothing the driver can do. The steering is thrown out of his control, the car is forced into a serious skid and there are great possibilities of injuries to all in the car.

Rather have a worn tire on a rear wheel, even though it will wear down so much faster, than risk it to the front. For greater safety, however, a tire that shows the first mark of a tread worn down to the fabric should be taken off and used only as a spare.

Even as a spare, it should be in use only long enough to get a good replacement.

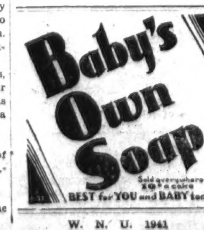

Keep On Working

Despite Disarmament Talk New War Weapons Being Invented

Just as a flippant to the disarmament discussions, we suppose you noticed that Haddfields, Limited, munition manufacturers of Sheffield, England, have developed a high explosive shell that will pierce the best quality of armor plate one foot thick, from a distance of ten miles.

While the world talks much of disarmament, the men who sit back and invent new schemes for killing millions keep right on working—and producing results.

China, the most populous nation in the world, had 479,821,000 inhabitants in 1930. That country has 110.4 persons for each square mile of land area.

W. N. U. 1941

Some Of The Advantages As Well As Disadvantages In Growing Of Reward Wheat

(By H. G. L. Strange)

As the wheat fields in Western Canada began to extend northward the need was felt for a wheat variety that would mature earlier than Marquis, so as to avoid damage from early fall frosts. Several new varieties had been produced by plant breeders to fill this purpose, notably the Red Bobs selections, originated by Dr. Seager Wheeler, Supreme, Early Triumph and Red Bobs 222, the latter having been re-selected by the University of Alberta, also the varieties Garnet and Reward produced by the Dominion Experimental Farm, Ottawa.

Because of its high yield Garnet wheat quickly became popular and in the last few years has increased in leaps and bounds in Northern Alberta and Northern Saskatchewan. Some concern, however, has been felt that because the milling qualities of Garnet are somewhat different to those of Marquis, and because Garnet flour has a slightly yellowish tinge, that the quality and reputation of Canadian wheat on the world's markets might be harmed if too large an amount of Garnet should be grown.

Because of this concern some have recommended that some of the other varieties might be better. Reward wheat is one that is widely recommended.

Reward was originated at the Dominion Experimental Farm, Ottawa, and is the result of a cross between Marquis and Prelude made by Dr. Charles Saunders in 1912. Under the direction of Mr. L. H. Newman, the present Dominion Cerealist, the variety was tested for several years by several hundred co-operators in different parts of the west. Finally the variety was released by the Minister of Agriculture for further trials by farmers in 1928.

Reward wheat has this year been accepted for registration by the Canadian Seed Growers' Association, which means that the scientific plant breeders of Canadian institutions consider that the variety is of good economic value and is well-suited for use in Western Canada. There can, therefore, be no need for hesitation in the use of this variety by any farmer who finds that their districts and farms are suited to Reward wheat. The Dominion Cerealist has now standardized the variety and Registered Seed of Reward, true to variety and sealed in the sack, will undoubtedly be available to farmers in the near future.

The official description of Reward wheat is as follows: Time of maturity 5 to 8 days earlier than Marquis—height of plant 3 to 4 inches shorter than Marquis on the average—strength of straw a little stronger than Marquis—awns absent except for a few short awns, usually irregular in length, glume covering, slightly to heavily pubescent (or hairy), depending on season and locality, grain color red, usually darker than Marquis, grain texture hard, rarely pitted or starchy.

The head of Reward is generally shorter and more lax than Marquis, while the spikelets are usually more or less irregularly arranged, giving the head a characteristic ragged or spiky appearance. As previously stated the glumes are pubescent or covered with short hairs which can usually easily be seen with the naked eye, magnifying glass. This is one of the ways with a magnifying glass. This is one of the characters that help in identifying the variety.

The milling and baking values of Reward wheat are excellent. It gives a high yield of flour. It bakes into bread, giving a large well piled loaf of excellent color and texture. The berry is uniformly plump, of a clear red color, seldom being pitted or starchy. This is the reason this variety will often bring No. 1 Hard and No. 1 Northern in the Northern districts where Marquis and some other sorts seldom obtain better than a No. 3 grade.

The straw is shorter and stiffer than in either Marquis or Garnet, and in wet years Reward will often stand up when some other varieties, particularly Garnet, go down. The chaff is tight on the kernel, which enables it to stand a considerable amount of moisture in the fall without sprouting in the stock, such as often happens with other sorts, particularly with Garnet.

It is from 5 to 8 days earlier than Marquis, or about as early as Garnet wheat in most places, although in other places it is 2 or 3 days later

than Garnet, but it is always earlier than Marquis.

Weights very high to the bushel. Usually two or three pounds more than Marquis, Garnet or other sorts. Weights of 85 and 90 pounds to the bushel are quite common with Reward wheat. Reward is probably the best of all varieties of Hard Red Spring Wheat for exhibition purposes. Its high weight per bushel, bright, plump and pleasing berry of good lustre usually win it a high place in competition with other varieties.

Reward wheat is not a rust resistant wheat, but because of its earliness in rust years often suffers less damage from rust than many of the other varieties. Investigations show that Reward wheat does not shatter as much as some of the other varieties, particularly Garnet.

On rolling land wheat on the high ridges usually ripens before that in the low spots. Reward will stand on these high places until after ripening for a considerable time without the berry shrinking or discoloring, thus the whole field can be allowed to ripen thoroughly before cutting; therefore the sample should be taken from the high places. Reward is an even color and plumpness even from such rolling land. Its stiff straw, early maturity, non-shattering head and ability to stand after ripening without much loss of plumpness, weight or color, makes Reward wheat an excellent variety to use for Combine Harvesting.

The most defect of Reward wheat at the present moment seems to be that on the whole the yield is lower than either Marquis or Garnet, but in some districts farmers state the yield of Reward is higher than Marquis or Garnet, and in many districts where most farmers report lower yields of Reward there are often one or two farmers who report higher yields. In most cases those who report high yields of Reward have seeded from seed to half a bushel more than is usual with Marquis or Garnet. Every case investigated where the farmer seeded two bushels of Reward to the acre reported as giving a satisfactory yield.

Trained Pets Earn Living For Owners

But Keen Competition In Hollywood Cuts Big Incomes

More than 150 families in and around Hollywood are solely dependent upon the money earned from trained animals and birds. There is once a time in the golden era of films that pets brought huge sums to their owners for their work before the cameras.

While these days passed on with the coming of talking pictures, there is still much money earned from trained animals and birds. There is still much money earned from trained animals and birds. There is still much money earned from trained animals and birds.

The quotations today at the studios for pets goes something like this: A good police dog with a menacing microphone bark earns as high as \$200 a day for its owner. A trained goose brings \$50 per day; a cat \$25 and there is said to be little limit for such freaks as a kinkajou and the celebrated parrot that swears in five languages.

This branch of the industry gained in such importance that there is hardly a bird or animal, including mice and rats, that cannot be obtained on a moment's notice for a picture scene.

An Old Advertisement

Egyptian In Third Century Wise In Business Matters

A cleverly written advertising sign, the idea of an enterprising business man in Egypt in the third century B.C., has been discovered by Dr. Reich, of Drops College. The advertisement, written on a small stone, has been deciphered as follows:

"Dreams I explain, holding the commands of the Gods. Good fortune! A Crete will interpret them."

This old advertisement was found by Dr. Reich as he examined a number of inscriptions from the Temple of Serapis, near Memphis. The Dream Interpreter's sign had been strategically set up before the Avenue of Sphinxes, which led to the temple. Along this avenue passed Egyptians who came from near and far to spend a few days on the temple grounds. They came in order to sleep there and to have their dreams interpreted by the priests, who were the official and paid dream-interpreters. The stranger from Crete was therefore daringly edging himself into the dream business against formidable competition of the priests.—Toronto Telegram.

Electrically heated uniforms and shoes for traffic policemen have been demonstrated.

Economic improvement in French Indo-China shows increasing momentum.

Russia announces the successful production of rubber from a plant named "towagwa."

Saskatchewan now has 136,071 farms and Alberta 97,623.

304

A LIKABLE LITTLE MORNING FROCK, FRESH LOOKING AND COOL

Don't you love it! It is a dress you can don when you are "doing things" and feel just right in it. It has no fuss and ends to get in the way of your gardening, making the house attractive, etc.

One's mind naturally runs to thoughts of dimity prints, batiste prints, etc. for such a dress. But there are other materials such as dotted piques, striped or plain linen, cotton mesh, tub silks, etc., which could enter the running, too. For this model, a blue and white dimity print with blue bias bands was chosen.

Style No. 304 is designed for sizes 36, 38, 40, 42, 44 and 46 inches. Size 36 requires 2 1/2 yards of 39-inch material with 7 1/2 yards of binding. Price of pattern 25 cents in stamp or coin (coin is preferred). Wrap coat carefully.

B. C. Douglas Fir Now Grown Extensively In England

During the eleven years ending in September, 1930, the Forestry Commission of Great Britain planted a total of 32,330,000 Douglas fir trees on various sites in England, Wales and Scotland. All these trees were raised from seed furnished by the Forest Service, Department of the Interior, through their seed-extraction plant at New Westminster, British Columbia. A considerable quantity of seed of other western species was furnished to the Commissioners from the same source. The New Zealand Government also took a large quantity of tree seed.

As a vocalist, Madame Galli-Curci is self-taught.

Just An Old English Custom

A. R. Garner may be truly said to carry his responsibilities lightly as he observes an old English custom and carries his bride, the former Miss Marjorie Pretwell, through the door of St. Cuthbert's Church, Yorkshire, after the ceremony.

Recent Discovery

Interests Astronomers

May Be Asteroid Nearer To Earth Than Any Yet Found

Astronomers at Mount Wilson Observatory and others in this country and Europe are keeping a close watch on Delport's "object," an asteroid or comet discovered recently by an astronomer at the University of Brussels.

"Our observations of it have disclosed no tail and seemingly only reflected light," said Dr. Frederick H. Sears, indicating that it is an asteroid and one much closer to the earth than any yet found.

He is assistant director of the local observatory, a branch of the Carnegie Institution of Washington. "Discovery of an asteroid nearer the earth," Dr. Sears said, "would enable us to obtain a more accurate value of the distance from the earth to the sun, upon which the measurement of distances to all heavenly bodies is based."

"We are much in the position of a surveyor computing the width of a river by shooting at a given point across the stream from two different points on its side of it, and determining the angles of the imaginary triangle. The narrower the stream the more accurate his measurement will be."

His computation of 93,000,000 miles as the distance of the sun from the earth is based on the estimate of 13,000,000 miles as the distance from the earth to Eros, the nearest asteroid yet found.

Device Changes Sound Waves Into Vibrations

Recent Discovery May Help To Overcome Deafness Of Many

A new device to help the deaf to hear, in which sound waves displace air organs such as a race horse jump a hedge, was shown for the first time before the national academy of sciences at Washington.

It does for the deafened person what his ear no longer can do—changes sound waves into vibrations which in normal persons are produced by three small bones of the middle ear. These vibrations act on the fluid of the inner ear, which in turn actuates the nerves of hearing.

The new device, developed by Dr. Frederick Bedell, of Cornell University, changes sound into the special vibrations artificially and sends them to the inner ear by way of the bones of the hand.

"Four-fifths of all deafness," said Dr. Bedell, occurs in the middle ear, interfering with the process of translating sound into signals that can reach the brain. His "deaf speaker" is designed to overcome this type of deafness.

Could Choose Programmes

Canadian Radio Owners Might Welcome Change In Broadcasting System

It has been consistently advocated by many newspapers that Canada should have a national system of broadcasting, still allowing the private stations to operate on the direct advertising basis, if such they prefer. This would give Canadians the choice of three programmes—those from across the line which cannot be kept out, those from private broadcasters in Canada, operated on revenue directly from advertisers, and those from provincial stations linked up in a national chain, financed largely through the radio license fee which Canadians now pay, but for which they receive no return. There would then no longer be almost entire reliance on United States stations to provide programmes which shut Canadian artists and organizations practically off the air in their own land.

Havana, Cuba, has a population of over 600,000.

Indians and Motor Cars

Claimed Many Accidents Have Resulted By Reason Of Cars Being Operated By Red Men

Forfeaking of the ancient pony for reckless motor car driving on the part of some Indians a little richer than their tribal friends, operates often to the detriment of the white man. In making this representation in the House of Commons, Thomas Reid (Lib., New Westminster), mentioned the specific instance of British Columbia Indians.

"Many of these Indians," Mr. Reid stated, "are careless in driving and accidents have occurred where other cars and persons have been damaged. The Indian, being a ward of the government, cannot be sued in the courts and I should like the minister of Indian Affairs to give some attention to this angle of the question."

Cottage Has History

"The Lone Eagle," a small cottage owned by Admiral Guy H. Burreage, at Hopkinton, New Hampshire, was built in large from the crates in which Colonel Charles A. Lindbergh's New York-to-Paris plane "Spirit of St. Louis" was shipped back to America.

Another thing that doesn't turn out as you wish is the auto ahead of you.

An insurance company estimates that it costs the average family \$7,200 to care for the average child from birth to eighteen years.

Great Britain And United States Unite In Opposing Abolition Of The Larger Naval Vessels

Rainy Lake Map Sheet

Lake Country East Of Winnipeg Is A Paradise For Canoeists

Very informative and interesting is the Rainy Lake Map Sheet of the National Topographic series, recently published by the Topographical Survey, Department of the Interior, Ottawa.

The map covers the country along the international boundary from Quetico, Ontario Provincial Park on the east to within thirty-three miles of the town of Rainy River on the west. In addition to agricultural, mineral, forest and water power resources embraced in the area, it is known as a great hunting and fishing region. The Port Arthur, Rainy River and Winnipeg line of the Canadian National Railways runs through the district from east to west, picking its way through the maze of lakes and rivers, which were the means of transportation from the time of the opening up of Western Canada until the railway came, about the beginning of the present century. The lakes and bays on country are a paradise for the canoeist, the fisherman, and the hunter, and the waterways are so intricate that the voyagers and trappers of the fur companies from the time of La Verendrye onward were always searching for shorter routes for the carriage of their furs and trade goods.

The chief centre of population is Port Francis, named after Lady Simpson, the wife of Sir George Simpson, one of the famous governors of the Hudson's Bay Company. Port Francis is situated on Rainy River a few miles below the point where it emerges from Rainy Lake. Near it are shown the water powers with which its name is associated. On the south side of the river in United States is the town of International Falls. The agricultural areas are chiefly in the western portion, extending from Port Francis to the townships indicated on the extreme western edge of the map.

The railways, highways and tourists into this part of Canada are also shown. The map which is more complete in all topographic detail of this district than any previously issued, may be had at a nominal price upon application to the Director of the Topographical Survey, Department of the Interior, Ottawa.

Canada's Dairy Industry

In Critical Condition Opinion Of Conference Held In Ottawa

The dairy industry group about Canada is in a critical condition. That was the conclusion reached at a conference held in Ottawa on April 11 and 12. Delegates were present from most of the provinces and the gathering was said to be thoroughly representative of the whole industry. It was declared unanimously that the situation has been brought about first, by failure to keep abreast of the world in methods of milk production and, secondly, by world-wide competition and prevailing economic conditions. The remedy for the one lies to a large extent in our own hands but the cure for the second is not so easily come at.

One of the remedies suggested was to pay a bonus upon all butter exported from Canada through a levy upon the production of butter in Canada. This policy has been followed with success by Australia and South Africa and it was strongly urged by the delegates from Western Canada and some of those from the east. The conference was unable to reach unanimous decision on the proposal. It was called at the request of Hon. Robert Weir, Minister of Agriculture, and Hon. H. H. Stevens, Minister of Trade and Commerce. Among the recommendations made was the following: "That your Government announce that an emergency has arisen in the dairy industry of Canada and take steps to launch at the earliest possible moment a nation-wide campaign to increase the efficiency of the dairy industry, through an educational campaign designed to lay the facts of the situation before all interested in the industry."

Canada has for years had nine departments of agriculture in as many different provinces, in addition to numerous agricultural colleges and courses. It seems strange if their united efforts have produced as little effect upon the dairy industry as the conference at Ottawa has indicated.

Prices May Be Better

Possibility Of Advance In Wheat Predicted By U.S. Official

A "strong possibility" of better wheat prices are seen by George B. Milnor, president and general manager of the Grain Stabilization Corporation. In a statement Milnor said:

"While in Europe I visited France, Italy, Germany, Belgium and England, and also met our foreign representatives from other countries. Europe will receive rather heavy imports of wheat between now and the harvesting of their new crop. Russia has practically completed the shipment of her wheat surplus from the last crop and the supplies from that source will be negligible until after harvest; therefore, Europe must look principally to Canada, the United States and Argentina for their supplies."

Spanish cedar is grown chiefly to make cigar boxes.

"I know. He told me."

Great Britain and the United States fought for their battleships at the Arms Conference at Geneva, forming a defensive alliance against an organized offensive of the small powers who wish to classify all ships over 10,000 tons as aggressive.

The small powers would abolish battleships or internationalize them within the League.

The United States and Britain received moderate support from Japan and Japan's encouragement from France.

Senator Claude A. Swanson, of Virginia, announced at the meeting of the naval commission that the United States unequivocally opposed classifying battleships as offensive weapons. They are the backbone of the United States defense system, he said, and "a threat to no nation," since we covet no one's territory. He stressed the United States obligation to keep the Panama Canal open in peace and war and to defend its Far Eastern possessions.

Speaking and gesturing in a senatorial manner, he continued: "If we had completed our naval programme after the war, it is conceded we would have been supreme on the seas, but we agreed to be a threat to no nation. The battleship is cheaper and more effective for defensive purposes than to build fortifications along our coastlines. Battleships have saved us a great and expensive army for defense purposes."

"We realize that naval power plus military power would menace every nation. We only wish the people who have armies had gone as far as the naval people in reducing and limiting."

He declared cruisers to be of greater offensive value than battleships, particularly in preying on commerce and blockading.

Vice-Admiral A. D. P. Pound, of Great Britain, supported Swanson, declaring that general naval superiority, not capital ships, enables attacks on trade. Similarly, he continued, it is not fair to claim that battleships are destined for carrying out invasions.

"The capital ships of the world can now almost be numbered on the fingers of the two hands," he said. "They are more precious than rubies to the countries possessing them. No nation is going to risk them by pitting them against coastal fortifications."

Baron Von Reichenbach, of Germany, announced that Germany is willing to sacrifice her powerful and efficient "pocket" battleships on the altar of disarmament if others scrap battleships over 10,000 tons. Defending the "pocket" ships as defensive rather than offensive, he said:

"Germany's 10,000-ton battleships cost one-half as much as your battleships. You would be saving money if you adopted Germany's restricted tonnage methods of construction."

He heatedly attacked the charges made by Charles Dumont, of France, that the "pocket" ships are offensive. He referred to the charges as a myth and introduced a technical demonstration of why the light ships were built speedily and heavily armed to defend Germany against the superior tonnage of foreign attackers.

He also criticized the United States thesis of the defensive nature of battleships, saying:

"What about the blockade of our ports, which was the decisive turning point of the World War?"

Facials, Shampooing,
Phone for appointments; or will call.

Makes Drastic Cut in Tax Rate

It will be welcome news for Lacombe tax payers, that the 1932 council has made a drastic reduction in the tax rate for this year, lowering same from 40 mills to 31, almost 25 per cent. The council has had this object in view since taking office, and by cutting out all unnecessary expenditures, have been able to accomplish their desire.

Mayor Jones and his council are to be congratulated—Lacombe rate-payers appreciate their good work.

GOLF NEWS

The President-Vice-President tournament is nearly completed. If you have not played your match, do so at once, and hand your score in to the tournament committee. The results will be posted next week, so all cards must be in by that time. The next competition will be the Dunlop Golf Ball Competition, in which every player must use a Dunlop Maxfli Golf Ball, and for which the Dunlop Rubber Company have donated three dozen Dunlop Golf Balls as prizes. The scores in the President-Vice-President Tournament will be used to divide players into three flights, so everyone will have a good chance to win prizes.

The repairs to the Club House are completed, and the appearance of the inside is being greatly improved. All golfers and tea members should take advantage of the Club House and use it. The evenings are perfect now.

Golfers are reminded again that they must turn in their scores by Tuesday of each week in order that they may count in the Tournament. There will be a tea as usual on Friday. We hope that the golfers will continue to be present in as large numbers as on last Friday.

BENTLEY NEWS

Born at the Bentley Hospital, to Mr. and Mrs. Dingman, of Sylvan Lake, a son.

Born at the Bentley Hospital, to Mr. and Mrs. Housary, a daughter. Mr. F. Freeman and Mrs. E. Patrick, of Calgary, spent the holidays at the home of Mr. and Mrs. Bert Thorp.

Mr. Beau, who was managing the Bentley branch of the Bank of Montreal, left for Edmonton on Sunday. Mr. Beacon, formerly Manager of the Ramsey branch, has taken over the duties of Manager at Bentley. Mr. Bud Damron, while fishing at Gull Lake on Wednesday last, pulled in a jackfish 43 inches long, and weighing 17½ lbs. This is believed to be one of the biggest jackfish ever hauled out of the lake. The fish is being preserved for exhibition purposes and anyone desiring this fish story can see the fish for themselves at Bentley.

The Bentley Hospital has installed a new Electric Washer, and a new machine. Mr. Alice Blalock, spent the week-end in Lacombe.

The contract for the building of the new creamery at Bentley was let to Joe Wright of Red Deer. This new creamery, to be situated across from the Atlas Lumber yard, will be the most up-to-date creamery in Alberta. All the newest and most modern equipment is to be installed. The work will be started immediately. Two new pasteurizers, boilers and engine are already in Bentley, and will be installed when the building is sufficiently finished.

The Bentley ball team opened the ball park on May 24th, when they met Kinsley.

Miss Marion Halpin, who has recently finished a course in finger-waving and hair-dressing of every kind will make regular visits to Bentley commencing next week. Appointments can be made by seeing Miss Gwen Harkin, R.N.M. at the Bentley Community Hospital.

Many of the Bentley people are fishing at Gull Lake these nice evenings, and are reporting good catches. Mr. Fay Johnson, Mgr. of the Bentley Drug Store, has installed the most up-to-date equipment for a complete soda fountain and ice cream service. This new ice cream parlor, located in the drug store, will be open right away. Come and look it over, you will be delighted.

TO THE DANCING PUBLIC OF CENTRAL ALBERTA

On Saturday night, the writer of this article had occasion to visit Sylvan Lake and while there visited the "Oriental Gardens", Alberta's most beautiful dance pavilion, located in hall made famous throughout Alberta by such bands as "Les Crane's Canadians," "Harvey and his Red Tux Boys," etc. The hall has been all re-decorated, the floor re-sanded and the place made bigger and better throughout.

People who have not visited this hall, should do so, you will be thrilled with the beauty of the surroundings, the gorgeous orchestra setting, and the music of Alberta's finest dance band, "Billy Adams and his Melody Crew," known throughout Canada by their daily broadcasts. Listen in to C.K.L.C. and hear this band, and be convinced. In the orchestra are such well known names many not new to you:

Byron Hanson, formerly of the Palliser Hotel Orchestra, Trombone. Allan Crawford, C.K.L.C. fame, Piano. Will Fiedler, Saxophones. Clarinet. Harry Howey, formerly MacDonald Hotel Orchestra, Saxophones, Clarinet. Robert Cowen, Saxophones, Clarinet. George "Red" Nicol, needs no introduction, Trumpet. Billy Adams, C.K.L.C. fame, Drums and Vocals. This all star

band is playing at the Beautiful Oriental Gardens at Sylvan Lake every Wednesday and Saturday night. Come and hear them, and see Alberta's most beautiful ballroom. Hear their broadcasts daily from C.K.L.C. at Red Deer.

Notice to Masons

The Banquet in the Church Hall on Monday, May 30th, will be at the hour of 6:15 p.m. The hour was inadvertently left off your notice.

AT THE AYALON

Robert Montgomery in "The Man in Possession".

Charlotte Greenwood plays the part of an English maid in "The Man in Possession". Robert Montgomery's new feature. One of the stage's best known comedienne, Miss Greenwood has portrayed every type of role but the picturization of the H. M. Harwood stage farce supplied her with still a new characterization in "The Man in Possession". Irene Purcell plays opposite Montgomery under direction of Sam Wood and the supporting cast includes C. Aubrey Smith, Reginald Owen and Allan Mowbray.

COMING

Warner Baxter and Edmund Lowe, in "Glad Kid", June 2, 3 and 4. Will Rogers in "Ambassador Bill", June 9, 10 and 11.

FEEDERS DAY

Over 800 steers were fed in the Lacombe district during the past winter. The Lacombe and District Board of Trade are anxious to see this phase of diversified farming increased and are arranging a Feeders Day during the second week of June.

PREMIER ANNOUNCEMENT

A grand celebration will be held in Lacombe on July 12th, sponsored by Lacombe L.O.L., 1600. Come help us celebrate the 40th Anniversary of Lacombe. Watch for further announcement. J. W. Wilkie, Sec.

SPURCHVILLE NEWS

There will be a meeting of the U.F.A. and U.F.W.A. at the hall on Monday, May 30th at 8 p.m.

Mr. B. W. Green, representing the North West Milling Co., Edmonton, will give a lecture. Subject: "Better Health," dealing with the manufacture of wheat into flour, etc. Everybody welcome.

Mrs. O. H. Walker left on Wednesday, 18th for an extended visit with relatives in the States.

Mr. and Mrs. Heath spent Sunday with Mr. and Mrs. Boulter. The ice cream social and dance held in the hall Tuesday night drew a good crowd, and every one had an enjoyable time. The ice cream was well patronized, keeping Cliff busy dishing out.

Mr. and Mrs. Riggs and Mr. Gordon Black left for Edmonton to attend the United Church conference.

GENERAL ELECTRIC REFRIGERATOR

The four-year service plan which protects a new purchaser of a General Electric refrigerator against all service costs on the Monitor Top refrigerating mechanism for four years, is the longest term warranty ever offered by any electric refrigerator manufacturer, said a representative of Morrison and Johnston, Ltd., distributors for General Electric refrigerators, in an interview Monday. He added that the announcement of the four-year guarantee period, as an indication of the high quality of the General Electric Refrigerator, had produced a very favorable reaction from the buying public.

"This increase of this warranty period from three years to four might have been expected, because the General Electric refrigerating mechanism was originally designed to require no service attention on the part of the owner. When, after fifteen years of research, the General Electric refrigerator was placed on the market, it was guaranteed for one year. Later when it lived up to confident expectations of engineers, the period of guarantee against service

expense was increased to three years. Now, because of the record of expense free performance, the Company has increased to four years, the guarantee on the mechanism against all service expense. This will apply to all future sales of General Electric Refrigerators."

It is understood that the longer guarantee is possible because of the simplified mechanism in the Monitor Top of this make of refrigerator. There are just three moving parts, sealed in steel and operating in a permanent bath of oil. These refrigerators are produced at the Peterborough plant of Canadian General Electric.

THE CHURCH OF ENGLAND IN CANADA

Dioecese of Calgary
St. Cyprian's Church, Lacombe
Rector: The Rev. T. H. Chapman
Organist: Miss Kathleen C. Walters

May 29th, 1st Sunday after Trinity (6th Sunday in month, Rector at home all day.)

Town Notes

HALF HOLIDAYS START JUNE 1
Store Wednesday half holidays for June, July and August begin Wednesday, June 1st, stores closing at 12 o'clock noon.

The Bob Inn Beauty Parlor will have Mr. Jacobson here June 1st, 2nd and 3rd, doing permanent waving. Phone R2718 for appointments.

The 4th of June is the day of the "Big Drive" at the Rainbow Cleaners. You'll have to rush to get your tickets in time for the draw.

The baseball schedule will appear in next week's issue.

Mr. A. Osterkamp suffered painful injuries to his face on Sunday last, while splitting wood with a rotary wood splitter. A stick of wood got jammed in the fly-wheel of the machine, and was thrown with great force, striking Mr. Osterkamp in the mouth and nose. Several stitches were necessary.

Dr. South has closed his Lacombe office, and can now be consulted in his Red Deer office. Phone 297.

The Bob Inn Beauty Parlor will have Mr. Jacobson here June 1st, 2nd and 3rd, doing permanent waving. Phone R2718 for appointments.

Remember the baseball game on Friday night at 6:00 o'clock when Wetaskiwin High School team will play against Lacombe High School team. These two teams are playing good baseball, and the game should be a good one.

Mrs. Locke returned this week from a visit to her parents, Mr. and Mrs. D. Calder, of Edson.

Wm. Parsons and family spent the week end in Lacombe, visiting with relatives.

For all your cleaning wants see Rainbow Cleaners first.

Try us for your cleaning and pressing. We use the d-filled C&D Solvent process. Rainbow Cleaners.

Mr. and Mrs. McMullen and family wish to thank their many friends for the kindness shown them in their recent misfortune.

Wait for Miss McCuskey for a permanent wave. See Adv.

Dr. Kerby, Principal of Mt. Royal College, Calgary will speak in St. Andrew's Church, on Sunday, May 29th. Dr. Kerby is also Grand Master of the Masonic Lodge which will speak to the local order, on Monday evening.

The government has taken off the 5c. tax on long distance calls where the fee is 15c. and under.

LEONARD McELROY, aged 19, son of Mr. and Mrs. H. McElroy, 1310 Cameron street, Beaumont, passed away Wednesday at 2:00 p.m. in the Regina general hospital. Leonard was well-known among the younger people of the city. He was attending his second year in the woodworking class at Balfour Technical school and was active in sports when suddenly stricken. He was removed to the hospital ten days ago.

NURSE ACQUITTED
OF MANSLAUGHTER
Edmonton, May 21.—Miss Bernita McElroy, 21-year-old graduate nurse of this city, was acquitted by a jury in the criminal court on Friday evening of manslaughter in connection with the death of Miss Faye Christensen, 21, of Edmonton, following a two auto crash on the Edmonton-

ment economically or socially—but in the process many of them will have come under the influence of the university atmosphere, (which has survived even the ravages of democracy) and will consequently have acquired some appreciation of knowledge for its own sake and perhaps that habit of disinterested speculation which intellectual sincerity is impossible.

Furthermore, it is reasonable to suggest that this last function is the most vital which the university can perform at the present time. It is gratifying and helpful for us to have a constant supply of efficient doctors, lawyers, teachers and other professional men—just as it is gratifying and helpful for us to have a constant supply of efficient butchers and bakers and candlestick makers—but, in the final analysis, the craftsmanship acquired at a university is perhaps of less social significance than the attitude of mind which may be there developed.

THANK YOU, SIR!

The following letter written by a prominent Edmonton Barrister, explains itself.

"Editor, 'The Gateway'."

"University of Alberta."

"Dear Sir—After an appalling waste of paper and printer's ink on fatuous features of 'April Fool' news stories, 'The Gateway' is to be congratulated for having turned its attention to the circulation of an intolerable publication and the presence of an intolerant preacher in the city of Edmonton. It is entirely fitting, Mr. Editor, that our university paper, which represents the liberal opinion of an enlightened student body, should take its stand against these deadly enemies of religious tolerance and personal liberty."

"It is doing neither an injustice to class the lascivious 'Hush' with the fanatical Maloney. Both adopt the sensational methods which are most likely to win attention and under the self-righteous guise of reformers play upon the sordid and morbid instincts of the public for their own benefit. The one spies upon the private lives of individuals and spreads before its readers a rich banquet of juicy morsels composed of low class and vulgar material; paints for their edification lurid pictures of sexual orgy and heinous anarchy. The other appeals to the religious prejudice of his bigoted followers and plants within them the seeds of fear and hatred of an innocent people."

"Of the two, Mr. Editor, I prefer 'Hush'. There is probably a minuscule of truth to its assertions, and it makes no bones about being a money making proposition. Maloney has repeatedly made statements regarding the Catholic faith which no one but a person blinded with the superstition of the middle ages could possibly accept. But unfortunately his wild stories and mad accusations have been taken seriously by certain gullible people, and it is necessary that we make a determined effort to combat the effect of his pernicious doctrine."

"I sincerely hope that you have fired the first shot in a war that will not end until both 'Hush' and Maloney are driven from our city. Students should be encouraged to speak openly against them at home and in the street in an effort to turn public opinion strongly against them. No self-respecting person will read the one or listen to the other. It is not an easy task that I point out for you, but the spirit of your editorials of last week encourages me to believe that you have chosen it for yourself."

"Very truly yours,
MELVIN I. FRIEDMAN"

GULL LAKE SPORTS
COMMITTEE
MEETING

There will be a meeting of the Gull Lake Sports Committee, in the Town Hall, Lacombe, on Tuesday evening, May 31, at 8:30 p.m. All interested in the Wrigley Swim and other Championship events, are urged to be present. There is only two months before the Big Event, and much work is to be done.

NOTICE TO CREDITORS
AND CLAIMANTS

IN THE MATTER OF THE Estate of Isaac Oliver Coverdale, late of the Town of Lacombe, in the Province of Alberta.

NOTICE is hereby given that all persons having claims upon the estate of the above named Isaac Oliver Coverdale, who died on or about the 27th day of February A.D. 1932 are required to file with the undersigned as solicitor for the Executors of the estate of the said deceased by the 8th day of July A.D. 1932 a full statement duly verified of their claims and of any securities held by them, and that after that date the Executors will proceed to distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been filed or which have been brought to the knowledge of their Solicitor.

DATED this 26th day of May A.D. 1932.
J. S. McCormick, Lacombe, Alberta,
Solicitor for the said Executors.

ADVANCED FEATURES...YES!

But Chevrolet Also Gives You

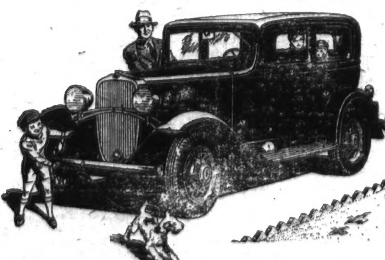

PROVED DESIGN

OF course, you want the new advancements in the car you buy today—easy gear-shifting—free wheeling—smoother, more powerful performance—better riding qualities! And you get them all in the Chevrolet Six—plus proved design. That is why the Chevrolet type of "economical transportation" is so much more enjoyable and satisfying.

Chevrolet is the lowest-priced car on the market combining Silent Syncro-Mesh Shifting with Free Wheeling! Chevrolet gives you easy-going speed, and more power for acceleration, when you need it most. The Chevrolet engine is mounted on thick-rubber blocks, utilizing the most modern method of preventing vibrations of body, fenders and doors! Only the Chevrolet Six in the low price field offers you the extra roominess and style of body by Fisher! The sturdy foundation of Chevrolet riding comfort is a long, strong frame with four modern, lengthwise-mounted springs and four Lovejoy shock absorbers!

And Chevrolet's balanced six-cylinder design—as well as every other vital part of the car—has been proved reliable by more than 2,000,000 owners, in billions of miles of service! Chevrolet long ago pioneered the six-cylinder engine in the low price field because this type of power plant strikes a perfect balance of smoothness and economy.

Nothing less than six cylinders can give multi-cylinder smoothness—anything more than a Six would mean a sacrifice of economy. It is a fact that the Chevrolet Six costs less for gasoline, oil and upkeep than any other full-size car! It costs less to own, too—at its new, reduced prices. Your present car will probably take care of the down payment, and you can pay the balance in easy instalments over a period of months.

Bacon and Ham Exports

Canada Is Now Recapturing Large Share Of British Market

That Canada is rapidly moving forward toward the recapture of her share in the British market for bacon and ham is indicated by the statistics of export of these commodities to Great Britain for the first quarter of the present calendar year in the opinion of Hon. H. H. Stevens. During the three months the total exportation to Great Britain amounted to 56,480,000 lbs. as compared with 15,821,000 lbs. for the corresponding period last year or an increase of 40,659,000 lbs. The percentage of increase is therefore approximately 257 per cent.

"In addition, it is interesting to note," a statement issued by the Minister of Trade and Commerce, says, "that during the months of February and March, Canada exported more than she imported to the Irish Free State 13,342,000 lbs. of bacon and ham. The Irish Free State has in the past, been regarded (with Denmark), as a serious competitor with Canada in the British market for these particular products."

Total exports of bacon and ham to all countries, for the first quarter year, amounted to 77,526,000 lbs. as compared with only 20,052,000 lbs. in the first three months of 1931, an increase of nearly 400 per cent.

To Great Britain alone during the first three months of 1932, Canada exported more bacon and ham than was exported during the entire 12 months of 1928. During the latter year less than nine per cent. of Britain's imports of bacon were supplied from within the Empire and only 14 per cent. of the ham.

Efforts on the part of the department of trade and commerce, through exhibitions and publicity in Great Britain designed to popularize Canadian products, including bacon and ham, coupled with educational efforts on the part of the department of agriculture to show to the farmer a standard of quality and continuity of supply are being achieved through advertised quality, says the minister, is apparently now being achieved in the production field.

Low Ocean Fares

Britain Preparing For Greater Invasion Of Tourists From Canada Than Ever Before

Britain is preparing for a greater invasion of tourists from Canada and the United States than ever before, this season. This is due to more determined efforts on the part of the Travel Association of Great Britain and Ireland, who have highly organized their resources for welcoming visitors to the Old Land.

Recent ocean rate reductions to the extent of 20 per cent. have now made it possible to spend a summer holiday by going to Europe, doing whatever night-seeing one's time permits, and returning to this country for an all-inclusive charge of less than seven dollars a day, according to the Cunard and Anchor-Denham lines. These tours in Europe include the best night-seeing in the time available, chiefly by motor coach, as well as by rail and steamer. These tours also include visits to the Continent, in France and Belgium especially.

"Modern Third Class" is used for the ocean crossing and to many people whose memories of Third Class date back to many years ago when they first came to Canada, this class offers surprising comfort. Nowadays, in fact, third class is more comfortable than first class was thirty or forty years ago.

Ontario and Quebec provinces expect to reap some benefit from the mass of tourists who pass through Montreal on their way to Europe, as many western Canada and United States visitors spend some time seeing Ottawa, Toronto and Montreal en route.

Aeroplane Patrol

Royal Canadian Mounted Police Will Use 'Planes On Both East and West Coasts

Aeroplanes are to be used by the Royal Canadian Mounted Police for preventive work on both Atlantic and Pacific coasts. Major-General J. H. MacRae, commissioner of the R.C.M.P., announced that arrangements had been made to employ a considerable number of 'planes of the Royal Canadian Air Force.

The aircraft will operate in conjunction with vessels of the preventive service, and will be stationed at strategic points on both coasts.

What Is Fame

What is fame? Upon the walls of the corridor leading to the Parliamentary restaurant at Ottawa, there are etchings of all the Prime Ministers of Great Britain. The other day, when two American visitors were walking down this corridor, one of them stopped, pointed his cane at the etching of Disraeli and knowingly remarked: "Ah, George Arliss."

To attract tourists this year France will have a "Buy French Scenery" drive.

The reader is often carried away by the author's train of thought.

"Always the Little Gentleman."
—London Opinion, London, England.

Hunters Saved By Radio

Magic Music Aided Them To Escape From Cannibals

This is the story of how two Englishmen hunting in the French Equatorial Africa, taken prisoners by cannibals and in imminent danger of being killed and served up for natives, escaped by using a radio to subvert the natural passions of the wild men. Music and strange voices blared forth safely. One of the captives was a Liverpool business man, A. J. Antoine, and the other a friend of his. They were captured and held prisoners. But the following evening Mr. Antoine thought of his wireless set. Music and strange voices blared forth suddenly. The wondering natives gathered around. Next evening they asked for more magic music. Every evening the two white men staged their wireless concert, and every evening the natives grew less hostile.

Then the batteries of the set began to run down, and the white men decided that it was time to escape. After three weeks' imprisonment they got away—with only a compass and their rifles. The natives pursued them, but the two white men obliterated their tracks by walking several miles through a river. Finally they arrived at a Belgian Congo border station—exhausted but safe.

Private Schools in Canada

Two Hundred and Ninety-Two Elementary and Secondary Schools in Dominion

Private elementary and secondary schools in Canada, not including the Province of Quebec, enrolled 34,973 students in 1931. The schools numbered 292, of which 66 were girls' schools, 52 were boys' schools, and 174 were mixed. Almost a third of the pupils lived in attendance. Of the total there were 19,890 in elementary grades, 11,223 in secondary grades, and 2,860 others, most of whom were doing special work at the high school level. Figures for Quebec are not yet available for 1931, but in 1930 there were in that province 624 private or independent schools with 57,841 pupils.

The overwhelming majority of the younger generation in Canada attend the public schools which come under the direct administration and control of the respective provincial governments. In most of the provinces both elementary and secondary education is free, the secondary education in some cases being as advanced as the first year in a recognized university.

Crime in United States

Murder Rate Nearly Seven Times That Of Canada

Our urban homicide rate is three times the average for 63 of the world's chief cities including many crowded countries where life is traditionally cheap. Our murder rate is nearly seven times the Canadian, and 13 times that of London, England. This difference between Canada and England furnishes a hint as to one reason for our own evil eminence. Life in new countries is less secure than in old settled regions. But it obviously does not explain why the United States should be half a dozen times as bad as Canada.—New York Times.

"So your uncle left everything to an asylum. Was it much?"
"His mother-in-law and an idiot brother."—Gutierrez, Madrid.

Tree Planting Car

Canadian Forestry Association Carrying On Good Work In The West

The Tree Planting Car of the Canadian Forestry Association which will commence its fourteenth year of spreading the gospel of tree planting on the prairies left Montreal after a thorough overhauling in the Canadian Pacific Railway shops at that point, on April 23, for Ottawa. At Ottawa it will be equipped, and then sent on to Regina, where Alan B. Beaven will take charge. The season of lectures on tree planting will open this month.

Mr. Beaven, who has been seven years with the forestry car, has prepared a real entertaining programme for the farmers, their wives, and children who attend, and is hoping that a new record in the number visiting the car will be established.

With drought conditions in the southern prairies during the past three years, the publicity that has been given the necessity of planting shelter belts and windbreaks, and the belief expressed that trees can and will play an important part, farmers have come to look on the problem of a treeless plain as one needing immediate action. They have learned from the experience of neighbors that mixed farming and tree planting on the prairies go hand in hand, and so efforts have been successful this year in bringing the gospel of tree planting to the people of the province.

The first two months of the tour will be spent in Saskatchewan, and later in the summer the car will travel through Alberta.

Influence Of Dominions

Efforts Made At Disarmament Conference Subject Of Favorable Comment

Well-informed visitors to the world disarmament conference at Geneva, who have returned to London, have been most appreciative of the efforts of the Dominions' representatives which ensured the adoption of Sir John Simon's resolution for qualitative disarmament.

The motion of the British Foreign Secretary was put forward in agreement with the United States, but French objections were of such a character the fate of the resolution was doubtful. At that time it was the Dominions' fully backed idea of the greatest need in paramilitary of British influence, took the initiative in urging Sir John to revive his resolution.

One of the features of the recent Geneva conference, it is learned, has been the definite influence of the Dominions on British policy, and nowhere has this been more clearly demonstrated than in the discussions on disarmament and the Shanghai disturbances.

Winnipeg Newspaper Union Fashion

430 IN THIS PRETTY DRESS, DIFFERENCE IS ARRIVED BY USING A PLAIN AND PRINTED FABRIC

Tiny girls love to have free and easy to wear clothes with skirts to swish about.

For those who look best with the fullest falling from the yoke, the narrow belt may be omitted.

It's a darling dress. The yoke and applied band at the hem are nautical blue plaid batiste. The dress itself is white batiste all covered in blue spots.

It's such a cunning scheme, and youngsters love it.

Dimity prints, voile prints, gingham checks, candy striped cotton broadcloths and plaid are also suitable.

Style No. 430 is designed for sizes 2, 4 and 6 years. Size 4 requires 1½ yards of 36-inch figured with ¾ yard of 30-inch plain material and 1½ yards of binding.

Price of pattern 25 cents in stamps or coin. (coin is preferred). Wrap coin carefully.

Photo-Electric Burglar Catcher

Will Also Shoot Or Gas Intruder Says Inventor

Grid glow tubes and photo-electric cells are being brought into play to help catch burglars.

"Dick Dead-Eye" is the name given to an instrument of tubes and coils which has been created by Dr. Philip Thomas, research engineer of Westinghouse Electric and Manufacturing Company. The apparatus is a network of infra-red or ultra-violet rays thrown over a room to protect property.

The invisible rays are so arranged that interruption by an intruder causes the cells to turn on lights in the room and to sound a loud alarm.

They can also be made to give an alarm at the police station, unknown to the intruder.

Simultaneously with the alarm and lights, photographs may be taken by a camera hidden in the wall. The burglar need not know of this as the infra-red rays may also be utilized for the purpose and the intruder remains in apparent darkness.

Dr. Thomas explained that he had trapped himself several times successfully with the instrument and that the device had proved workable under various conditions. The photographs were ready for distribution within twenty minutes.

Possibilities of "Dick Dead-Eye," Dr. Thomas says, are limitless, as a burglar may be tear-gassed, made senseless by an odorless gas or even shot down by an automatically operated pistol.

Trying New Experiment

Scientists Will Endeavor To Test Atmosphere During Sun's Eclipse

Science will take advantage of a 98-second total eclipse of the sun on August 31, to check up on Professor Albert Einstein's theory of astral light deflection. Elaborate plans for the test, which will utilize all modern equipment possible, with aeroplanes and balloons taking a major part, were announced by Northwestern University, Chicago.

When the moon's shadow wipes out the sun's light for the few brief moments, balloons carrying aerological instruments, and aeroplanes bearing additional delicate recording equipment, will be ready to meet the occasion over Freiburg, Me.

Freiburg, said Dr. Oliver Justin Lee, Associate Professor of Astronomy, was chosen because forecasts indicate that the most favorable weather conditions will prevail there.

This will be the first time, Dr. Lee said, that science has ever undertaken to determine what happens to atmospheric pressure and temperature during the eclipse. If plans materialize, one of the astral expeditions will climb 30,000 feet where clouds or haze won't interfere.

The full eclipse will sweep down from the Arctic region, across the Province of Quebec and the North-eastern corner of the United States, and will then pass out over the Atlantic at Cape Cod.

Goes Into Reverse Gear

Hen seems To Make Better Speed Walking Backwards

A hen that walks in "reverse gear" has been found by students of the Georgia State College for Women, who learned that the hen could walk either backward or forward. But at feeding time, when the fittest fowl gets the most, the hen goes into reverse and makes better speed this way than by going forward. The college girls were first attracted as they watched in amazement from their dormitory windows as the chicken nonchalantly walked backward around the edge of a chicken house roof.

Britain Will Lead The Way

Famous London Merchant Says England On March Back To Economic Recovery

"Of course England will lead the world in the march back to economic recovery," declared Gordon Selfridge, famous London merchant, in the course of an interview at Toronto.

"England will be at the head of the parade just as in the past. It is character that does it. We are carrying tremendous burdens. We haven't a bit more money than we had a while back when things were at their worst, but we are on our feet."

Willing To Make Deal

She (concluding the quarrel, laughingly) I suppose you would like your ring back?

He (politely) I would rather—unless you can find someone quickly to take over the remaining instalments.

Certain Is Right

Friend: Say, there's a bunch of people outside waiting to be presented to you. Among them is a bishop who says he married you some time ago.

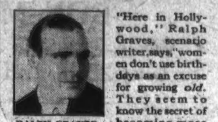

Girl: (After a long pause) I'm practically certain I never married a bishop.

So large is the collection of cups and trophies owned by the late Sir Thomas Lipton that it will require two months to prepare them for exhibition at the Art Galleries at Kelvingrove, Scotland.

The forests of Quebec cover an area of more than 155,000,000 acres according to recent estimates.

"DON'T BE ROBBED OF YOUTH!"

SAYS RALPH GRAVES

"Here in Hollywood," Ralph Graves, scenario writer, says, "women don't use birth-control pills as an excuse for growing old. They seem to know the secret of becoming more and more alluring year after year."

"The secret and stage stars usually keep that lovely irresistible glow that youngsters have. And lots of other women, these days, seem to have learned their complexion secret."

"Above all, guard your youth," says Graves. "The stars will advise you. 'Use gentle, soothing Lax Toilet Soap regularly as we do!'"

Actresses the world over use fragrant, delicately white Lax Toilet Soap to keep their complexion as soft as a baby's. It is the official soap of the 604 important actresses who are devoted to it, this fine soap is official in all the great film studios.

You are sure to love the way it cares for your skin! The caress of dollar-a-cake French soap for just 10c!

Flood Sufferers In China Are Starving

Matter Brought Before League Of Nations Manchurian Commission

News of 6,000,000 Chinese flood sufferers in the Hwei River Valley north of Anhwei are existing chiefly on grass and bark, which some are being sold in a local market, was brought to the attention of the League of Nations' Manchurian Commission at Peking.

The affected area was estimated at twice the size of New York State. The chief supply of food has been relief wheat from the United States. But owing to the trouble at Shanghai between the Chinese and Japanese and inconvenient transportation conditions only 4,000 tons of wheat thus far have reached the Hwei Valley, said Shaowu Peter Chuan, superintendent of the National Flood Relief Commission for the North Anhwei area.

It will be late in June before the wheat crop will have matured and the problem is to feed the starving millions, while the authorities do everything possible to improve transportation. Meanwhile, the refugees have been eating grass, weeds, sprouts and the bark of trees.

Relief workers reported to Chuan that the market price for the sale of humans is \$1 in Chinese money, or about twenty cents in American, for each year of the person's age. A ten-year-old child sells for \$10 or about \$2 in gold, the rate rising \$1 a year until the age of 25, when the price begins to recede.

A New Weapon

Egg Bomb For War Against Automobile Bandits In England

The chief weapon in England's new war against automobile bandits will be a secret "egg bomb," with which every policeman will be provided. The missile, invented by a former army officer, contains adhesive chemicals, and contaminates everything it hits on explosion. Occupants of the car struck by an egg bomb will be indelibly marked, assisting in their capture. It is understood that the bomb leaves a decided odor also.

Probably Correct

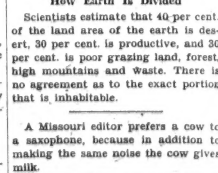

Theological Lecturer: "Yes, my friends, some admire Moses, who instituted the Old Law; some Paul, who spread the New. But, after all, which character in the Bible has had the largest following?"

How Earth Is Divided

Scientists estimate that 40 per cent. of the land area of the earth is desert, 30 per cent. is productive, and 30 per cent. is poor grazing land, forest, high mountains and swamps. There is no agreement as to the exact portion that is inhabitable.

A Missouri editor prefers a cow to a saxophone, because in addition to making the same noise the cow gives milk.

DR. HAMILTON'S PILLS FOR HEADACHE, BILIOUSNESS, CONSTIPATION, INDIGESTION, KIDNEY, LIVER, BOWELS.

When TEETHING makes HIM FUSSY

One of the most important things you can do to make a teething baby comfortable is to see that little bowls do their work of carrying off waste matter promptly and regularly. For this nothing is better than Castoria, a pure vegetable preparation specially made for babies and children. Castoria acts so gently you can give it to young infants to relieve colic. Yet it is always effective, for older children, too. Remember, Castoria contains no hard drugs, no narcotics—it is absolutely harmless. When your baby is fretful with teething or a food upset, give a cleansing dose of Castoria. Be sure you get genuine Castoria with the name:

CASTORIA

An impressive military funeral was held at Ottawa Monday for the late H. Joy, of the Royal Canadian Mounted Police, was buried. He was to have been married the day following his death.

Proves London Doctor Wrong

Someone Estimates Body's Material Worth More Than Dollars

A London doctor says our bodies are worth less than \$1 each for the materials they contain. We could fill a 10-gallon tank with the water in our bodies, make seven bars of soap with the fat, rid one dog of fleas with the sulphur, make a medium-sized nail with the iron, make 2,500 match heads with the phosphorus, make 9,000 lead pencils with the carbon, provided we could extract it. We could produce a dose of salts with the magnesium we contain, and could whitewash a chicken-coop with our own lime—again provided we could extract it.

Soap Used Without Water

A waterless soap has been developed by a chemist attached to a joint concern in Kansas City. The soap, in the form of a paste, is said to be harmless to the skin and even possesses healing and antiseptic qualities. It lathers freely without water and absorbs all dirt.

Argentina has only about 7,000 plants using steam for power.

Porto Rico Imported \$1,000,000 worth of jute bags in 1931.

MINARD'S "KING OF PAIN" LINIMENT

W. N. U. 1941

New Super-Silk Stockings—Grenadine Heavy Service and "Whisper" In Lovely New Summer Shades At New Lower Prices!

A. M. CAMPBELL'S

DISCONTINUANCE OF

THE WHEAT BONUS

The Hansard report on the discussion on the proposal to renew the government's five cents a bushel bonus on Western wheat revealed that much of the eastern opposition to continuance came from the agricultural interest in the east. Among those who expressed opposition to Mr. Gardiner's proposal were Miss Agnes MacPhail and Hon. Ernest LaPointe. The latter inquired why there should not be a bonus for butter and eggs and potatoes, all of which were being produced at a loss. The reply to that contention is that of all the products of agriculture, wheat plays the most vitally important part in the national life of Canada and consequently is more entitled to special consideration.

Undoubtedly the urgent need for economy was also a factor in the decision to discontinue payment of the bonus. Then there is the likelihood of market conditions improving considerably during the coming year, and it may not be so greatly needed as last year.

The distribution of the bonus on the 1931 wheat production meant an additional sum of more than \$5,000,000 in the pockets of Alberta farmers. There is no doubt whatever but what these farmers are appreciative of the government's action in making the payment during a most discouraging period, and they cannot blame the government for the decision to discontinue it. Unfortunately the bonus payment could not be distributed on an absolute basis of equity because farmers who had poor crops, had less benefit than those with larger yields and consequently needed it less. This aroused an agitation for a bonus on an acreage basis and thereby a complicated situation was created. A division of opinion developed in the west, while eastern sentiment was strongly united.

REPORT URGES GARNET

WHEAT BE SEPARATED

Ottawa—The recommendations of the Grain Standards Board in 1931 for a separate grading of Garnet wheat are endorsed by the agricultural committee of the House of Commons in a report submitted to the House to take effect for the crop of 33-34. The board is given a free hand, however, to make changes in the proposed standards if it finds conditions warrant it. The report reads:

"Your committee in view of the evidence presented before them, a printed copy of which is herewith presented to the House, present the following recommendations:

"Your committee recommends that the Canada Grain Act be amended to make operative for the crop year 1933-34 the recommendation of the Western Grain Standards Board, insofar as it relates to the grading of Garnet wheat as contained in the annual report of the Board of Grain

Commissioners for Canada for the year 1931. Provided that the said amendment shall have force and effect for the crop year 1933-34, unless the said board shall, after giving due consideration to the evidence given before your committee, and conditions then existing, establish standards for the grading of Garnet wheat for the said crop year, different from the standards recommended by the said report of 1931."

THE SALE BY PRIVATE TREATY

Mrs. P. McDonald will sell privately the following articles: Golden Oak Dining Room Suite consisting of Sideboard, Table and Chairs. Tapestry covered couch. Iron Bed with new Springs and mattress. To Our Friends and Patrons

When a merchant puts on a sale these days, the public makes one of these two remarks: "He has loaded himself with too much stock," or "He must need the money." In our case both remarks will apply. Owing to various causes business has not been what was expected for the past year, and we do find ourselves overstocked; and the lack business has also put us in a position where we do need the money. To get the needed money we decided to put on this sale. All who know our store need not be told that the goods we are offering at sacrifice prices are our regular stock. Nothing has been brought in to make the sale. The same high class goods you have been in the habit of buying here are now on sale at low prices. Everything in the store will be sold as advertised, and even at the very low prices, our guarantee of quality and value stands.

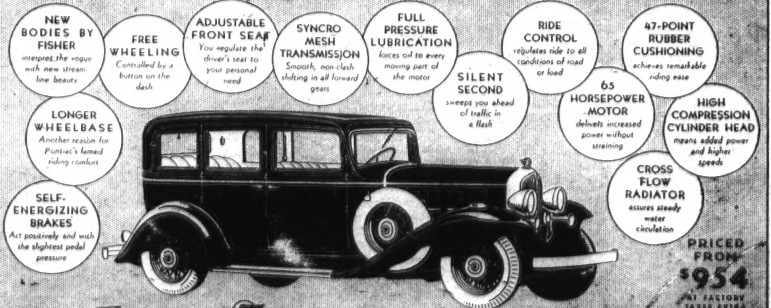

The Clearing Sale, which opened on Saturday morning last, brought results far beyond our expectations—in fact doubled our highest estimate for the first day. Evidently thrifty buyers recognized this as a chance of lifetime to save dollars on needed furnishings. We wish to thank those who patronized us so generously, and assure them that their business was appreciated. The big sale still continues, with greater values than ever, and we invite everyone to come in and look around.

When the sale is over the store will be remodelled throughout, and a complete new and up-to-date stock placed on our shelves. We thank you all.
